

MJL Newsletter

A note from the CEO:

I want to personally thank all of our present customers and potential customers for giving us the opportunity to serve your fabrication needs. The journey I started 2 ½ years ago, as the owner of MJL, has been both challenging and exciting. It has given me the pleasure to meet fine people and leaders of great organizations like yours. We have strived for excellence and achieved a great deal in the past two years, but we still have more work ahead of us. With your support and help, we are confident that we will be a top tier supplier of choice. Thank you for your continual support.

Ray S. Fatemi

Fall Humor:

Q: Why did they let the turkey join the band?

A: Because he had durmsticks!

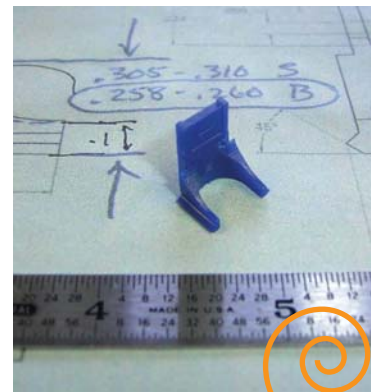

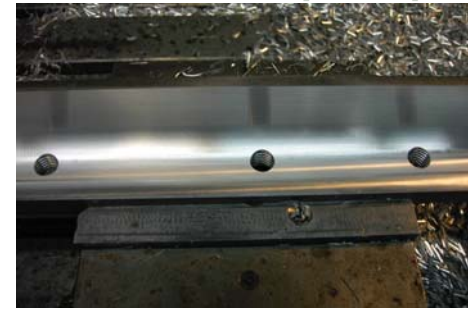

Happy Thanksgiving

■ MJL recently purchased a CNC Cincinnati Milacron Hawk 250 lathe with 3" Bore, programmable tail stock, part catcher and hydraulic chuck.

■ MJL delivered on 5,800 parts for Sikorski Aircraft with 32 micro-inch surface finish and +/- 0.0002" tolerance on OD and ID, 17-4 PH Stainless Steel (NSN: 5365011122966)

■ MJL was awarded a contract for 25,000 13-8 MO pins. MJL innovative fixture design allows for fabrication of 210 pins at a time. This system is designed to concurrently output 420 pin per run and has expansion capability to 630 pin per run. These pins are passivated after machining.

Customer Corner

By launching this Newsletter, our goal is to interact with our valuable customers. This newsletter is more about you. So if you have any news, events, announcements, or information that you want to share, please forward those to us and we will publish them in the upcoming issues of this Newsletter
